

February 2011 Birth Defect News Bulletin

Hello! I have important information to share with you on the electronic birth defect program. Quite a few of you have given me input on the program and the most important thing I have heard is that you want to be able to enter more than one defect item at a time. I want you to know that we now have this available for you.

If you are on the **Birth Certificate**, all you need to do is a **Ctrl-A** for a new birth defect case. **Save it!** Then do a **Ctrl-F** to get the **defect item** up to fill it out. **Save it.** If you have another one, do a Ctrl-F to enter the new defect for the defect case. Save it. Etc. You never have to leave the defect item area once you have entered one!

When you are completely finished with the record, exit out of the defect item and birth defect case and birth certificate back to the main menu. I hope that this helps you enter your defects more quickly and efficiently. If you have any questions please call me at (402) 471-0354 or e-mail nila.irwin@nebraska.gov.
